Skills

- JavaScript
- NodeJs
- Golang - GO
- Python
- NestJs
- TypeScript
- ReactJs
- Units Test
- SQL
- NoSQL
- Git
- PostgreSQL
- Apis REST
- Docker
- Microservices
- Agiles Methodologies
- Kubernetes
- Google Cloud Platform (GCP)

Languages

- English: B1 Intermediate
- Spanish: Native Speaker

Profile

Specialized in designing scalable solutions and optimizing algorithms under **SOLID** principles and **design patterns**. I perform as a Senior Software Developer with proficiency in **NodeJs, Go, Python, and ReactJS**, leading the modernization of critical architectures toward high-performance microservices. I manage complex projects using agile methodologies, guaranteeing high availability standards, technical efficiency, and continuous improvement in every delivery.

Employment History

Full Stack developer at Falabella, Santiago Chile

JANUARY 2022 — MAY 2026

Led the migration of the Electronic Tax Documents (DTE) infrastructure to a cloud-based architecture on **GCP**, transforming legacy **NodeJs/NestJS** services into high-performance microservices in **Golang**. This modernization optimized response times and ensured scalability for electronic invoice delivery on **Google Cloud Platform (GCP)**.

Full Stack developer at Xintec, Santiago Chile

APRIL 2021 — DECEMBER 2021

Developed microservices for various business units at Falabella using **NodeJs** and **NestJS**, while leading web development and API integration with ReactJS. I executed these functions working under **agile methodologies**.

Software developer at ImageMaker, Santiago Chile

JUNE 2020 — APRIL 2021

Developed the ScotiaBank insurance portal as the sole Frontend Developer using **ReactJS**. I executed the project under **agile methodologies**, managing the end-to-end frontend implementation.

Full Stack developer at Trebol It, Santiago Chile

SEPTEMBER 2019 — JUNE 2020

Developed microservices for the Clínica Alemana admission system using **NodeJs**, while also contributing to the development of the system's web platform using **ReactJS**. I executed these tasks under **agile methodologies** to ensure efficient delivery.

Software Developer at Acepta, Santiago Chile

MARCH 2018 — SEPTEMBER 2019

Developed high-volume **Python** microservices for the DTE unit and engineered technical upgrades for the ICar system to enhance platform reliability. Leveraged **PostgreSQL Shell (psql)** for database scripting and performance tuning, ensuring data consistency and optimized response times across transactional platforms.

Senior Software Developer at PDVSA, Caracas Venezuela

MARCH 2004 — DECEMBER 2017

Designed and developed distributed systems and backend applications for oil production and supply chain using **Python, NodeJs**, and **PHP**. Led agile teams through the full SDLC, optimizing large-scale databases and integrating legacy systems with modern architectures. Developed automation tools that significantly improved data reliability and operational monitoring for national-scale projects.

Systems Analyst at Bancaribe, Caracas Venezuela

JANUARY 2000 — MARCH 2004

Developed stored procedures in **Sybase** databases. Analyzed and resolved technical incidents related to customer checking accounts, ensuring data integrity and system reliability.

Education

**Specialist in Telematics Mention in Computer Network Technology,
Universidad Politécnica Federico Brito Figueroa, La Victoria, Venezuela**

2011 — 2012

**Bachelor of Computer Science, Universidad Simón Rodríguez, Los Teques,
Venezuela**

JUNE 2006 — JUNE 2009

**Higher Technician in Computer Science, Instituto Universitario Tecnológico
Región Capital Dr. Federico Rivero Palacio, Caracas, Venezuela**

JUNE 1997 — JUNE 1999
